PORTFOLIO

1. Greenwood House

Design / HTML / CSS / CMS

Greenwood House is a client of Weblications. I worked on design, development, and trained the clients in the content management system, so that they could make website updates at their leisure.

2. Fundraiser Auction

Graphic Design / Concept

The Kenwood Education Foundation reached out to me to design a poster, invitation, and RSVP for their fundraising event. They wanted something "country" and I came up with the lights, cowboy boots and barrel over a wood background.

3. Healthy Snack

Graphic Design

The Camp Experts is a client of Weblications. The client provided a word document with specifications for a flyer to be printed and used at the local mall and distributed through local schools.

4. Rick's Lawn Care

Design / HTML / CSS

Rick came to me with a Facebook page looking for a professional web presence. I enjoyed working from scratch on the project to give Rick a professional and clean look. The white backdrop allows his work to take center stage. The project is still in development at this time, but we hope to have all the content before the spring.
